

SANDEEP BAZAR

Senior Engineering Manager | Hyper-Converged Infrastructure, Kubernetes & Applied AI

+91 9545253067 | sandeepbazar@gmail.com | Pune, Maharashtra, India | [linkedin.com/in/sandeepbazar](https://www.linkedin.com/in/sandeepbazar) | sandeepbazar.github.io/About

SUMMARY

Engineering manager with 14 years at IBM India Systems and Development Lab, now running three squads on hybrid-cloud platform infrastructure: virtualization, hosted control planes, multicloud management and observability. Stays close to the architecture, and owns the product's agentic AI work. Executive PhD in progress at IIM Udaipur.

SELECTED ACHIEVEMENTS

- 20+ engineers across three squads today, two of them started from the first hire.
- Modern Data Protection in Pune: founding member and lead. 100+ engineers today.
- Six granted US patents, two IBM Redbooks, an IEEE paper and an OpenStack Summit talk.

CORE SKILLS

Leadership	Building and scaling teams Hiring and career development Technical vision and roadmap Distributed, matrixed organizations
Platforms	Kubernetes and OpenShift KubeVirt and hosted control planes Open Cluster Management Docker
Storage & HCI	Hyper-converged infrastructure (IBM Fusion HCI) Software-defined storage (IBM Storage Scale) SONAS and V7000 Unified Backup and recovery NFS, SMB, object
Applied AI	In-product AI assistant (MCP + LLM) Agent skills and tool design AI-assisted diagnostics and operations LLM application and evaluation patterns watsonx.ai
Engineering	Go, Python, C/C++, Java, Linux Prometheus, Loki, Elasticsearch Jenkins, Git, Docker

PROFESSIONAL EXPERIENCE

Senior Development Manager - IBM Storage Fusion

Sep 2022 - Present

IBM India Systems and Development Lab

Pune, India

Promoted from Senior Technical Lead.

- Lead 20+ engineers across three growing squads in IBM Fusion: virtualization, multicloud management and AI solutioning.
- Own agentic AI for the product alongside virtualization and multicloud, building the in-product AI assistant for Fusion HCI on MCP and LLMs.
- Built the Virtualization and Multicloud squads from scratch, from hiring and technical direction through to the first production deployments.
- Own priorities, roadmap and production readiness for enterprise hybrid-cloud infrastructure.
- Run goal-setting, reviews and development plans across several squads.
- Led the architecture of the observability framework and built it in Go on Prometheus, Loki and Elasticsearch. Improved several existing platform microservices.
- Lab advocate for large enterprise accounts, so field problems reach engineering as prioritized work.
- Drive AI-assisted diagnostics and platform-operations work to improve serviceability.

Technical Lead - Storage Scale, Data Protection & Escalation Engineering

Feb 2016 - Aug 2022

IBM India Systems and Development Lab

Pune, India

Storage Scale lead, Modern Data Protection founding member and lead, and Asia-Pacific escalation engineer.

- Founding member and lead of IBM's Modern Data Protection team in Pune. Set up hiring, onboarding and the lab.
- Led IBM Storage Scale Object on OpenStack Swift across RHEL and Ubuntu, owning design, review and the Jenkins build and release pipeline.
- Worked as the Asia-Pacific escalation engineer for IBM Storage Scale on a 24/7 rota, taking CritSits directly with global customers.
- Wrote diagnostic tooling that cut the time it took to isolate distributed-storage failures.
- Co-authored two IBM Redbooks. Mentored engineers into test, build and lead roles.

Software Engineer - Storage, Security & Cloud Platforms

Oct 2012 - Jan 2016

IBM India Systems and Development Lab

Pune, India

- Owned quality engineering and automation for SONAS, V7000 Unified and IBM Storage Scale.
- Led authentication and security certification across Active Directory, LDAP, NIS and OpenStack Keystone, and qualified the NFS, SMB, object and SNIA CDMI stacks.
- Ran continuous integration and fix propagation across several concurrent release streams.
- Wrote Java and Python tools for object storage and storage-utilization reporting.

Software Engineering Intern

Sep 2011 - Sep 2012

IBM India Systems and Development Lab

Pune, India

- Built a cloud storage and sync service for SONAS and V7000 Unified in Java on SNIA CDMI. It won the IBM Innovation Showcase and became an IEEE paper.
- Wrote a log-analysis tool in PHP and MySQL that support engineers used to cut down debugging time.

EDUCATION

Executive PhD, Operations Management (in progress)

Jul 2025 - Jun 2028

Indian Institute of Management (IIM) Udaipur

Research area: Artificial intelligence and technology management.

M.Tech, Computer Science & Engineering

2010 - 2012

KIIT University, Bhubaneswar

CGPA 9.39. AICTE GATE Scholarship, two years.

B.Tech, Computer Science & Engineering

2006 - 2010

Jawaharlal Nehru Technological University

PATENTS – SIX GRANTED, UNITED STATES

- Dynamic control of a smart home using a wearable device - US 10072866, US 10250403, US 9473321
- Controlling implantable medical devices using wearable technology - US 10226632
- Identifying and managing redundant digital content transfers - US 10419557
- Overriding feature to unblock contacts in energy-saving mode - US 9965024

PUBLICATIONS, TALKS & OPEN SOURCE

- IBM Redbook - IBM Spectrum Scale Security (REDP-5426), 2018
- IBM Redbook - Deployment Guide for IBM Spectrum Scale Unified File and Object Storage (REDP-5113), 2017
- IEEE - Enterprise Compatible Cloud Object Storage and Synchronization Service, 2012
- OpenStack Summit, Tokyo - Mobilize Platform Agnostic Adaptability for Object Store, 2015
- IBM Community - Bringing Agentic AI to IBM Fusion Fleet, 2026
- Medium - article series on IBM Fusion, Kubernetes MCP and agentic operations, 2026
- IBM Storage Strategy Days and IBM user-group sessions - customer-facing technical presentations, 2026
- ibm-fusion-mcp-server - maintainer. Fork of the open-source Kubernetes MCP server (Go), extended with IBM Fusion tools.
- ocm-mcp-server - personal project. MCP server that puts policy checks, approval and audit between an AI agent and a Kubernetes fleet.
- ai-roadmap-365 - personal project. Open-source nine-course AI curriculum, from computing fundamentals to designing, evaluating, securing and deploying production AI systems. 141 of 365 lessons published.

AWARDS & CERTIFICATIONS

- Winner, IBM Innovation Showcase (2012), for a cloud object storage and sync prototype on SNIA CDMI
- IBM Execution Excellence and Eminence (2017); IBM Collaborative Influence (2017)
- IBM Team Excellence (2018); IBM New IBMer (2013); Star of the Month, several times
